

About

It is virtually inevitable: at some point, nearly every company faces workplace injuries and must address complicated workers' compensation issues. Often the sheer volume of mandatory paperwork, reports, and billing statements can make it difficult to monitor medical and rehabilitation costs in an efficient manner. Precision Bill Review will ensure that you pay only what you owe.

We specialize in reviewing your medical expenditures and pursuing favorable negotiated rates.

- ✔ National PPO network coverage
- ✔ Fee negotiation
- ✔ Mandated state reporting
- ✔ Imaging/OCR/Established Partnerships
- ✔ On-site bill review services
- ✔ Bill review services with certified coding and auditing professionals

WE HAVE IT COVERED

The Precision Bill Review system is integrated to include all elements of medical cost containment. Key elements of our system include review of bills to state regulated fee schedules, application of PPO network discounts, sophisticated duplicate checking, enhanced bill review edits, claim system integration, and flexible management reporting. In addition, we can perform high level reviews on large dollar claims based on customer's unique specifications. All of these capabilities enable us to take a knowledgeable and thorough approach to justify every workers' compensation expenditure you make.

A PROACTIVE APPROACH

In addition to standard reductions, our Precision Bill Review service gives you more. Our staff of highly skilled professionals will initiate the fee negotiation process on inpatient, ambulatory surgical center, or outpatient facility services to a high level review status based on criteria established by you. PBR has access to credible national databases that ensure our clients capitalize on their savings potential. Through detailed analytics, PBR is able to determine the network mosaic that produces the deepest discounts for each client based on location and claim mix. These enhanced services ensure clients maximize their workers' compensation dollars through a proactive customized approach to each client's needs.

WEB-ENHANCED TECHNOLOGY

We put the Web to work by offering a "window" into the bill review process. Our web-based portal gives the user access to information regarding bills that have been submitted for review. It can also provide access to extensive historical information, including explanations of review (EOR), denials, reconsiderations, and more. It is all done over the web, from any Internet-enabled computer, with encryption to ensure maximum security. Keeping tabs on your workers' compensation has never been easier!
